Technical skills

I USE THESE EVERYDAY

Figma / Framer
Rive
Cursor
Jira

I KNOW THESE VERY WELL

Adobe Creative Suite
Claude Code
Github
Linear

I AM FAMILIAR WITH THESE

Storybook
PostHog
Webflow
Midjourney

Experience

DoorFeed | Senior Product Designer, Web

2026 – Present

- Led end-to-end UX audit of the maps and location analysis flow, identifying critical drop-off points through session replay analysis and reducing upload journey friction by consolidating 4+ fragmented interactions into a single, filter-driven view.
- Drove alignment on a redesigned information architecture for complex portfolio views, cutting redundant UI states and establishing a scalable pattern across flows.
- Partnered with engineering to evaluate Mapbox capabilities and address location accuracy constraints across geographies, translated technical limits into user-facing trust signals.
- Established a design decision documentation practice, ensuring product and engineering rationale was captured to accelerate future iteration cycles.

SigTech | Product Designer, Web

2024 – 2025

- As sole designer on a cross-functional team, led product definition and delivery for two B2B finance analytics products, validating 5 AI use cases — including interactions with non-deterministic outputs — through rapid prototyping and stakeholder review.
- Rebuilt Figma design system integrated with engineering libraries using ShadCN open source components, ensuring accessible, reusable patterns; reduced design-build iteration cycles by 40%.
- Owned prototyping and direct feature delivery in Cursor via Figma MCP, shipping 10+ components with states into the production design library and reducing engineering maintenance load.

Brush | UX Designer, Web + Mobile

2021 – 2023

- Built design systems and validated product concepts across multiple start-ups and scale-ups during my Masters degree
- Halved MVP validation time through rapid and no-code prototyping (Framer, Webflow).

Deloitte | UX Designer, Web + Mobile

2019 – 2021

- Designed accessible enterprise platforms in a regulated environment, improving task completion speeds and ensuring full WCAG compliance through close collaboration with engineering and accessibility specialists.
- Developed an NLG tool that reduced reporting time by 20%; an early signal of applied AI/data UX in a production context — awarded The Ideator innovation prize.

Education

Goldsmiths, University of London	2022
MSc. User Experience Design	
NIIT University	2019
B.Tech., Computer Science (Honours)	

Additional Work / Interests

Product Design Ladies, UK Social Media Coordinator	2026 – Present
· Create content and manage the social media calendar and updates for PD Ladies, a London-based community for female Product Designers and User Researchers
